## The ClearWater Promise

ClearWater Systems Ltd. has a long-standing reputation for providing quality water treatment products and services to our fellow Bermudians. Water filtration, reverse osmosis and UV disinfecting products like our very own ClearWater branded ClearRO4, the **SQC Pro**, our **UVB** line (**UVB 1**, **UVB 2**, **UVBB 2** and **UVBB 3**).

It's a reputation we're proud of and a tradition we're pleased to continue.

We promise to help you make the best choices to protect your health and ensure your family's safety by providing you with current and accurate information (like our **water treatment term glossary**) and a comprehensive range of services and products that we have tested ourselves to determine their compatibility and effectiveness under Bermuda's often temperamental and unforgiving climate and conditions as well as **products that can save you money over the high cost of bottled water** or even our **newest product that can make water from air - the Aquamaker**.

We promise to treat you fairly; to respond to your requests promptly; and to keep you and your family's health and safety as our top priority by servicing, repairing or replacing your water treatment equipment as quickly as we can.
